Some schools only go to table 10. However, it is always useful to practice tables 11 and 12 times. It is especially useful to learn 12 times the table, because it regularly appears in many math problems and even in everyday life. In addition, moving behind the tables 10 times, there will be interesting models that will give students the confidence to solve more complex problems in the future. These free 12-fold table worksheets give you an excellent tool to practice and memorize tables. 12 times the table is probably the hardest multiplication table to memorize. However, there are some tips to help you find out this table faster. Let's look at some of the sums.  $1 \times 12 = 12$ , or it is  $1 \times 10 + 1 \times 2 = 10 + 2 = 12$ . It's 2nd.  $2 \times 12 = \dots$ , i.e.  $2 \times 10 + 2 \times 2 = 20 + 4 = 24$ . Now we can move a little and explore  $9 \times 12$ ,  $9 \times 10 + 9 \times 2 = 90 + 18 = 108$ . This method is a great way to practice 12 times the table, if not already memorized. It is important to practice and repeat multiplication tables on a regular basis. We recommend at least 10 minutes and even 15 minutes to achieve the best results. Times tables are the basis for more elaborate calculations and your overall math understanding. The exercises presented here are suitable for the mathematics education taught in primary school.
